

>Referenciação Bibliográfica com Suporte Informático

Introdução às Aplicações Mendeley e Zotero Francisco Freitas | CES-UC

>Esta apresentação serve de suporte às sessões presenciais sobre referenciação conduzidas pela BNS. Nestas sessões, existe lugar à realização de exercícios práticos relativos à gestão de referências bibliográficas e sua utilização em documentos. Face à diversidade de soluções e plataformas existentes, a informação aqui presente não é exaustiva e servirá sobretudo de referência para as atividades e exercícios apresentados, sendo expectável que surjam diferenças aquando da utilização das aplicações consideradas.

Conteúdos da Apresentação

- Gestão de Informação Bibliográfica
- Tutorial Zotero
- Tutorial Mendeley
- Referências e Recursos

>Gestão de Informação Bibliográfica

Gestão da Informação

- Aspeto crucial para o desenvolvimento de uma tese/investigação
- Gestão de informação (definição): colecionar, armazenar, adaptar, organizar, editar, utilizar, partilhar informação
- Um sistema de organização da informação deve ser eficiente e funcional...
- Soluções para otimização dos processos?

Critérios de Seleção

- Funcionalidades
- Adequação ao projeto em curso
- Sistema Operativo (SO) em utilização
- Tipos de plataformas de trabalho necessárias (e.g. web, local, móvel)
- Orçamento
- Sustentabilidade
- Preferências pessoais (desde logo!)
- Tipo de aplicação e interoperabilidade
- Utilização individual e/ou em equipa
- Partilha de informação

Opções...

RefWorks EndNote zotero Papers MENDELEY CEtavi Como noutras áreas, existe uma oferta alargada e inúmeras alternativas

Abordagens dicotómicas não são bom ponto de partida (e.g. código-aberto vs. proprietário/comercial)

Não existe "o melhor" gestor de referências bibliográficas

Escolha deverá ser tão informada quanto possível tendo em conta os critérios de seleção e as necessidades existentes...

Na Escolha de Qualquer Aplicação

Os dados são seus?

Os dados estão protegidos?

A informação é transferível? (i.e. pode ser migrada para outra aplicação?)

O que Esperar destas Aplicações?

- São ferramentas de utilização simples
- Utilizam um interface acessível
- Permitem a navegação por uma biblioteca pessoal
- Destinam-se à referenciação e citação bibliográfica
- Permitem a importação/exportação de dados
- Importante: estes programas realizam a indexação dos dados (descrição/identificação)

Algumas Funcionalidades

- Organização/gestão de PDFs e outros documentos
- Plugin para citação em processadores de texto
- Destaque/anotação nos ficheiros
- Sincronização multiplataformas
- Acesso a bases de dados
- Estatísticas de leitura
- Application Programming Interface (API)

- Pesquisas de informação
- Ferramentas colaborativas
- Redes sociais e comunidades
- Fóruns de discussão
- Assistência técnica e suporte
- Integração com sistemas de gestão de bibliotecas
- Tecnologias de extração de metadados

Principais Arquiteturas

Organização da Informação

 Podem ser albergados e referenciados inúmeros formatos diferentes (e.g. livros, capítulos em livros, artigos de revistas científicas, páginas internet, diplomas legais, etc.)

 Estruturação da informação faz-se a partir dos Metadados

Ficheiros & Metadados

- 3 dimensões fundamentais:
 - nome do ficheiro
 - tipo de ficheiro [*.bib, *.xml, *.ris, *.txt]
 - metadados ("dados dos dados", i.e. campos com informação como autore(s), título, criador(es), editor(es), datas, palavras-chave, resumo, ano de publicação, etiquetas, etc.)

>Introdução ao Zotero

Zotero

- Aplicação de código-aberto que é disponibilizada em várias versões, incluindo a integração direta em browser
- É especialmente eficaz na recolha de informação e referências diretamente a partir da Internet
- É integrável com os principais processadores de texto
- Permite a introdução de anotações e/ou comentários
- Pode armazenar ficheiros em vários formatos
- Permite a utilização com aplicações direcionadas para a edição de conteúdos online
- O interface está disponível num conjunto alargado de linguagens
- Muitas opções de personalização

[1_Instalação e Configurações Iniciais]

Aplicação está disponível no endereço www.zotero.org. A partir desta página, é possível criar uma conta de utilizador para a gestão de todas as referências. Os exemplos seguintes irão decorrer da utilização do Zotero em conjunto com o navegador Mozilla Firefox, a solução predefinida.

Para a seleção de versões ou conetores, deverá visitar-se a página <u>https://www.zote</u> <u>ro.org/download</u>.

São possíveis diferentes combinações, deverá escolher a mais indicada para o seu caso. Nota: é importante que o sistema operativo e respetivas aplicações estejam atualizas e funcionais.

Using Zotero with Firefox? We've made some important changes to the way Zotero works.

Zotero 5.0 for Windows

Your personal research assistant

Download

Other platforms macOS · Linux 32-bit · Linux 64-bit

Looking for Zotero 4.0?

Zotero Connector

Save to Zotero from your browser

Install Firefox Connector

Zotero Connectors automatically sense content as you browse the web and allow you to save it to Zotero with a single click.

Zotero Connectors for other browsers

Plugins

Install one of the many third-party plugins and become even more productive. Browse Plugins

BNS Biblioteca Norte | Sul Depois de corretamente conectado, ficará disponível um ícone dedicado no canto superior direito do Firefox para carregamento das novas referências:

Depois de instalado o *plugin*, é importante um ajuste inicial das preferências e definições da aplicação. Neste separador, é por exemplo possível verificar se o *Add-In* do Microsoft Word está corretamente instalado ou ajustar as definições de sincronização através da inserção de nome de utilizador e palavra-passe.

No separador geral, verificar que a caixa relativa à importação automática de ficheiros PDF está ativada. No separador relativo a citação, é possível aceder a um gestor de estilos. Os estilos de citação podem ser personalizados. É possível adicionar ou retirar estilos. Se o estilo pretendido não estiver disponível, deverá clicarse em "Get additional styles..." para aceder ao repositório de estilos.

Quando acedida online, a biblioteca é apresentada no formato disponível na imagem. As entradas podem ser sincronizadas em diferentes dispositivos se introduzidas as mesmas credenciais.

[2_Importação/Criação de Referências]

Existem múltiplas formas de importação de informação para o Zotero. Uma das mais importantes consta da importação de informação bibliográfica diretamente a partir de catálogos online.

Exemplo 1: Importação a partir de Catálogo Online. Através do repositório JStor (<u>www.jstor.org</u>), efetue uma pesquisa utilizando o termo "big data".

A nova entrada passa a constar da sua biblioteca pessoal. Nota: tenha em conta outras opções de importação. Por vezes nos repositórios eletrónicos são disponibilizados ficheiros passíveis de importação direta, tal como é apresentado no diapositivo seguinte.

Biblioteca Norte | Sul

Exemplo de tipos de ficheiros importáveis diretamente para Zotero:

Nas entradas da biblioteca pessoal, os campos disponibilizados variam em função do tipo de item. Tais campos podem ser editados a qualquer momento. Poderá ser guardado o endereço original da publicação para referência futura. Teste as diferentes opções.

Nota: os valores dos campos devem sempre ser alvo de confirmação, mesmo quando existir recurso a identificadores e preenchimento automático.

💰 🗖 🗛 🛛 🗙 ۰ 🜾 Info Notes Tags Related Item Type: Journal Article Title: Political Campaigns and Big Data Author: Nickerson, David W. - - + • • Author: Rogers, Todd Abstract: Publication: The Journal of Economic Perspectives Volume: 28 Issue: 2 Pages: 51-73 Date: April 1, 2014 m d y Series: Series Title: Series Text: Journal Abbr: The Journal of Economic Perspectives Language: DOI: ISSN: 0895-3309 Short Title: URL: http://www.jstor.org/stable/23723484 Accessed: 07/10/2015, 20:38:02 Archive: Loc. in Archive: Library Catalog: JSTOR Call Number: Rights: Copyright © 2014 American Economic Association Extra: Date Added: 07/10/2015, 20:38:02 Modified: 07/10/2015, 20:38:02

Para adicionar um ficheiro relativo a uma determinada publicação, bastará clicar com o botão direito do rato sobre a entrada em causa e selecionar "Add Attachment\Attach Stored Copy of File":

Exemplo 2: Importação Estruturada a partir de Catálogo Online. Experimente, por exemplo, aceder ao catálogo principal da British Library, disponível a partir do seguinte endereço: <u>http://www.bl.uk/</u>.

Efetue uma pesquisa por termo chave, por exemplo *"overfit"* (quando um modelo estatístico descreve um erro aleatório ou ruído ao invés de uma relação entre dados), verifique lista de resultados, deverá ser semelhante à apresentada. **Repare no novo ícone exibido.**

O Zotero faculta várias opções de adição rápida para os diferentes tipos de entradas existentes na Internet. Neste caso, ao clicar sobre o ícone "Save to Zotero" disponibilizado, obterá uma nova caixa para seleção e importação estruturada de múltiplos itens.

Exemplo 3: Utilização de Identificadores. Através do recurso a metadados e a identificadores (i.e. DOI, ISBN), é possível uma catalogação automatizada da entrada. Nota: uma página Internet poderá ser guardada com ou sem um "instantâneo" da mesma.

Ffetue uma pesquisa simples num motor de busca, por exemplo expressão "Against the Gods", correspondente a um livro. Procedimento é válido para outros suportes. Localize o ISBN respetivo, neste caso específico com 10 dígitos: 0471295639.

Para tal, bastará então digitar ou copiar/colar o código apropriado na caixa disponível em "Add Item(s) by identifier". O Zotero fará consulta e apresentará resultado, quando existente. Entrada será adicionada automaticamente à sua biblioteca.

Exemplo 4: Criação de Nova Entrada Manualmente. Para lá da importação de entradas com recurso a identificadores, poderá adicionar ficheiros diretamente, por exemplo artigos em PDF. Efetue uma pesquisa no periódico *Big Data & Society*. Localize o artigo "Big Data ethics", de Andrej Zwitter, transfira o PDF respetivo:

Adicione uma nova entrada através do classificador indicado:

Anexe o ficheiro e preencha os metadados. Nota: obviamente seria possível a importação automática do ficheiro, este caso serve para exemplificar a criação manual de uma entrada. Explore as opções relativas à abertura de PDFs.

[3_Referenciação]

No Microsoft Word, se corretamente instalado suplemento, passa a existir um separador denominado Zotero, no qual estão disponíveis os principais comandos. Componha um pequeno texto e insira algumas referências.

🖬 🔒 🗲 🖱 🕫

Depois de selecionar "Add/Edit Citation", surge uma caixa de diálogo para que seja introduzida informação relativa à entrada a localizar na base de dados. A entrada selecionada ficará destacada a azul. Poderá sempre abrir Zotero diretamente.

>Introdução ao Mendeley

Mendeley

- Aplicação comercial que é disponibilizada para os principais sistemas operativos
- É especialmente eficaz na gestão local de informação
- É integrável com os principais processadores de texto
- Permite a introdução de anotações e/ou comentários
- Pode armazenar ficheiros em vários formatos
- O interface é simples, mas está disponível em Inglês unicamente
- A versão livre faculta uma boa capacidade de armazenamento
- Boa gama de funcionalidades para atividades de partilha online de informação

direito sobre

determinada

entrada.

É especialmente importante o ajuste das opções relativas à organização dos ficheiros (e.g. cópia para pasta local) e a gestão automatizada do nome dos mesmos.

No exemplo seguinte poderá verificar organização centralizada através de pasta local Mendeley. Os nomes dos ficheiros são automaticamente geridos pelo programa.
