

## Glass Boundaries Project went to school

In the 20<sup>th</sup> of January a session concerning the presentation of the Glass Boundaries project's goals and dissemination of results. The session was organized in the scope of the [CES goes to school](#) program.

The session was ministered by the researcher Celso Fuinhas and it involved 3 classes (around 80 students and 3 teachers) from the 11<sup>th</sup> and 12<sup>th</sup> grade. This was the first of action of a program that will take part in different schools in the north and center of the country during the current school year.

The CES goes to school program has as its objectives the diffusion of scientific knowledge by sharing the research work undertaken in CES with schools and other educational centers. It is expected that these actions will foster critical discussions about the problems facing contemporary society.
